

Craig Lutz Challenges his Opponents to a Debate

Last night the citizens from North Hall County were able to [hear](#) from the two candidates that would like to represent them on County Commission. I challenge my opponents to meet me in South Hall County to discuss ethics, spending, taxes, sewer and planned growth. I have a plan to address each of these items and it is time for the people to hear all plans so that they can make an informed decision when they head to the polls on July 20.

In a representative democracy, we vote for people to represent our interests in government. In order for the people to know our interests, they need to hear it from us. It is easy for someone to say that they would like lower taxes or improved ethics, but if they lack a plan they will not be able to execute. I have specific items that when elected I would like to implement that will improve the ethics ordinance, control spending, maintain or lower taxes and reduce the average sewer rates.

Join me in demanding that all the candidates meet in an open forum to air out our views, plans, and differences.
