

It is time to take away the Chairman's Vote.

Every year the commission votes to set the rules for the year, see item [6B](#). And every year they readopt Robert's Rules of Order and amend it to allow the chairman to make and second motions and to deliberate.

Normally the chairperson would only vote in the case of a tie or to make a quorum. We have seen the damage that has occurred on the Chairman's motions, I believe it is time to strip him of this right. Since there is a possibility that the Chairman could break ties, I do believe he should be allowed to deliberate.

If elected, I will not allow the Chairman to make motions or seconds and only allow them to vote in the case of a tie.
